

TAP INTO THE POWER OF YOUR DATA WITH COMPUNET AND SPLUNK

Your people, infrastructure, and devices will continue to produce an ocean of data. Together with Splunk, we can help you tap into the collective power of that data to tackle some of your biggest IT and business challenges.

SPLUNK IS FAR MORE THAN JUST SECURITY

While most know Splunk for security, their Data-to-Everything™ Platform also offers a ton of impactful use cases across both IT and DevOps.

With Splunk, you can unify all your machine-generated data onto a single platform to improve:

- Data accessibility**
Access and search data from any source, and across any device
- Data usability**
Visualize data and get real-time alerts when thresholds are met
- Business insights**
Create and share data-driven insights across your organization

AND THAT'S JUST SCRATCHING THE SURFACE!

Splunk empowers you to take advantage of the data your organization produces to overcome challenges, introduce new capabilities, and get more out of IT investments you've already made.

SO, WHAT CAN COMPUNET AND SPLUNK DO FOR YOU?

Through our high-touch and consultative approach, we will help you identify your true needs and provide expert guidance on when, where, and how you can benefit from Splunk – even if you're already using it.

With Splunk's game-changing platform, we can help you:

- ✓ Gain complete visibility and observability into your entire hybrid IT estate.
- ✓ Understand how your business and technology are performing in real-time.
- ✓ See where security threats exist so you can protect your valuable assets.
- ✓ Ensure your people, devices, and workloads meet compliance mandates.
- ✓ Easily meet logging requirements and uncover insights hidden in log data
- ✓ ...and so much more!

ALREADY OWN SPLUNK?

If you aren't seeing the value or have difficulty managing your Splunk environment, we offer full-service deployments where we handle all the details so you can focus on benefitting from Splunk.

THE VALUE OF A PARTNER LIKE COMPUNET
